RE: Energy Project Installation Data Report

We became aware of the special rebate available through Energy Innovation Group (EIG) for lighting retrofit projects through an announcement from California Hotel and Lodging Association (CH&LA).

EIG arranged for the entire Doubletree facility to be reviewed for opportunities to improve the lighting's energy efficiency and developed a report of the recommendations, savings, rebates, and installed cost.

The project has been completed and resulted in over 60% reduction of our total lighting bill, amounting to approximately \$37,000 annual savings. EIG secured a special non-utility energy rebate of almost \$33,000, equaling approximately 43% of the project cost.

The projected savings from the project will cover the cost in less than 14 months. The aesthetics of the lighting and light levels appear to be improved.

Sincerely,

Bob Petrie
Director of Engineering
