RE: Energy Project Installation Data Report

Installation has now been completed as specified for the Charles M. Schulz Sonoma County Airport energy project arranged by Energy Innovation Group (EIG).

We understand the final rebate amount was based on an inspection to confirm actual kWh savings. Based on the completed scope of work, 135,976 kWh reduced energy use is projected, representing approximately 40% reduced lighting costs, \$20,000 annual savings, \$18,000 rebate covering 48% of project cost, and a full cost recovery from savings in less than 12 months.

Sincerely,

Jon Stout  
Airport Facilities Manager
